

FROZEN BREAD & BAGEL FACILITY ULTRAVAPOR DEMONSTRATION RESULTS

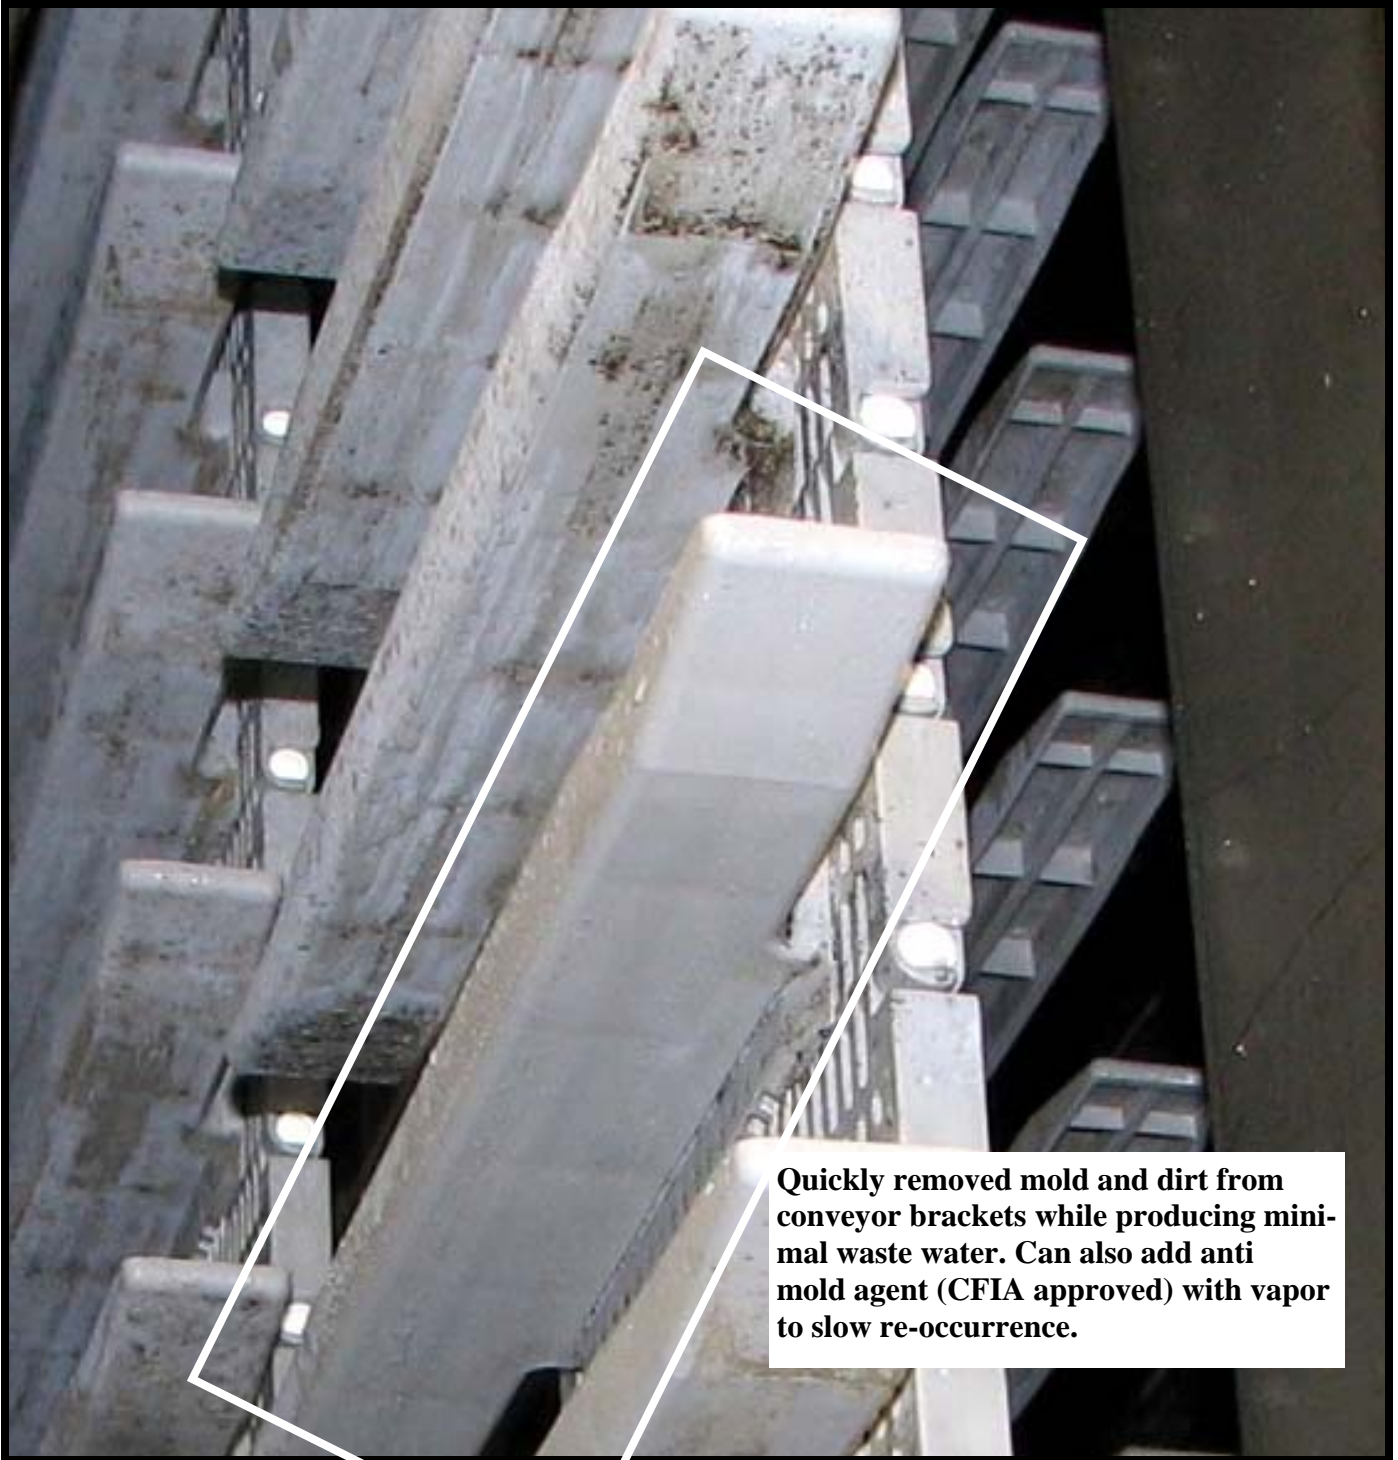

October 2007

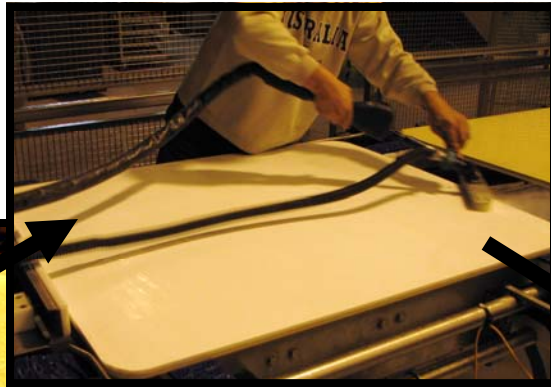

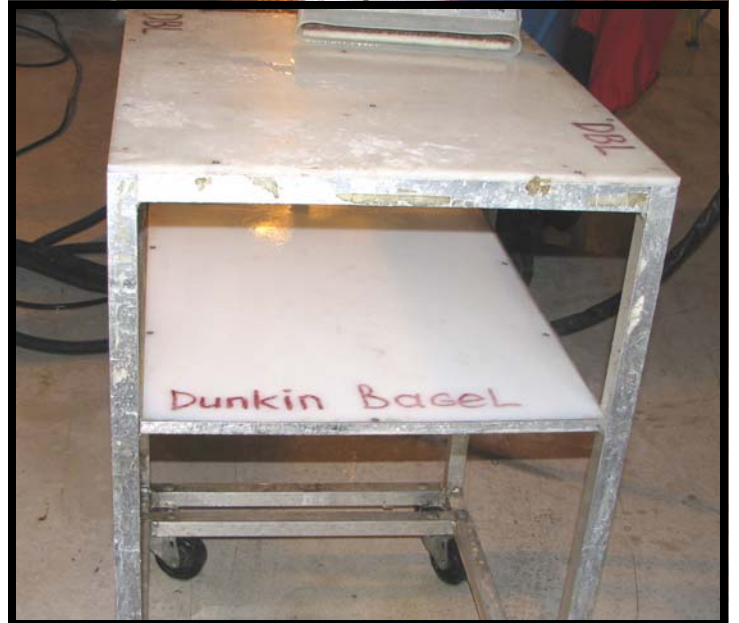

Equipment demonstrated: Special II 18 KW UltraVapor machine with 1.5 HP vacuum and assorted accessories.

For the applications demonstrated, particularly the freezer, a 9 KW Super unit would be sufficient for cleaning and eradicating mold.

Quickly removed mold and dirt from conveyor brackets while producing minimal waste water. Can also add anti mold agent (CFIA approved) with vapor to slow re-occurrence.
